

About Project A

Project A is the operational VC that provides its ventures with capital, an extensive network and exclusive access to a wide range of operational expertise. The Berlin-based investor makes use of the €260m in assets under its management to back early-stage companies in the digital technology space. With its unique organizational structure featuring 100 operational experts, Project A offers its portfolio companies hands-on support in the areas of Software Engineering, Marketing, Design, Communications, Business Intelligence, Sales and Recruiting. The portfolio includes companies such as Catawiki, WorldRemit, uberall, Homeday, Spryker, KRY, and Wonderbly. You can find more information at www.project-a.com and on the blog insights.project-a.com.
